Mobility for Vesicles Research in Europe

MOVE – *Mobility for Vesicles Research in Europe Grant*

NLSEV is happy to announce the second round of the Mobility for Vesicles Research in Europe Grant (MOVE).

The purpose of the Fellowships is to foster collaborations between the members of different European EV Societies. The Fellowship will enable Early Career Researchers to travel to a host lab in Europe to start novel collaborations, develop their technical skills, and enlarge their professional networks.

In 2023, NLSEV will award one mobility grant. A list of potential host labs is available on the MOVE website (https://www.ukev.org.uk/move-mobility-ev-europe/). You may choose a host lab at an academic institution from this website, but also other relevant host labs that are not yet listed. Make sure to contact your envisioned host PI and ask for his/her availability before you submit your application.

Application instructions

Who can apply?

- PhD students and Postdocs (<5 years after obtaining their PhD) who
    - Work at an Academic Institution in the Netherlands.
    - Are enrolled in the NLSEV contact list.
- You may apply multiple times, but once granted you may not apply again.

For what to apply?

- One mobility grant in 2023.
- Travel & subsistence reimbursement for a visit to a host lab in the EU, outside the Netherlands.
- Duration of the visit: ≤ 3 months.
- Maximum € 2000.
- Bench fees are not reimbursed.

When to apply?

- Deadline December 31st, 2023.

How to apply?

- Fill in the NLSEV MOVE application form and save as a single pdf file.
- Send the pdf file to **info@nlsev.nl**

How is the application evaluated?

- By 5 NLSEV board members.
- Evaluation criteria
    - Scientific quality of the proposal
    - Relevance for the candidate
    - Relevance for the home lab
    - Motivation for the choice of host lab
    - Relevance for the Dutch EV community

What we ask in return

Awardees can be asked to

- Present the experience and/or results of their lab visit at the next annual NLSEV meeting.
- Provide a summary to be published on the NLSEV website and social media.
- Acknowledge the MOVE fellowship in publications that contain data resulting from their lab visit.
